FDA's statement to Healthline 3 regarding lipo-dissolve

Sep 20, 2007 02:20 PM

We are aware of the practice of using Lipo-Dissolve and are investigating and evaluating it. It is NOT FDA approved.

In fact, there are no FDA-approved drugs with an approved indication to dissolve fat and FDA cannot assure the safety and efficacy of these types of drugs.

Consumers need to know that this is a buyer-beware situation. These are unapproved drugs for unapproved uses and we can't guarantee consumers' safety.
